Aspiring Data Analyst | Computer Science Engineering Student

Contact details: Add your professional email, GitHub and LinkedIn URLs before sharing this resume.

## PROFILE

Third-year Computer Science Engineering student at Atria Institute of Technology with programming knowledge in Python, C and SQL. Interested in Data Analytics, problem-solving and technology, and keen to develop practical analytical skills through projects and industry experience.

## EDUCATION

**Bachelor of Engineering (B.E.) – Computer Science Engineering**
Atria Institute of Technology
Currently pursuing – 3rd Year

## TECHNICAL SKILLS

**Programming:** Python, C, SQL
**Tools explored:** Arduino, Tinkercad, PSpice, Matplotlib and CSV-based data handling (through learning and project exploration)

## PROJECT EXPERIENCE

**Smart Water Pipe Leakage Detection – Ongoing Academic Project**
Currently building a model exploring vibration-based detection of possible water pipe leakage using an Arduino setup, vibration sensor and buzzer. Physical model development is in progress.

**Mental Health Mood Tracker – Project concept discussed**
Python project concept involving mood entries, CSV storage and Matplotlib visualisation. Development status not yet confirmed.

**MediWise – Medicine Information Chatbot – Project concept discussed**
AI chatbot concept for exploring medicine-related information using Python and datasets. Development status not yet confirmed.

## CERTIFICATION

**Python Programming** – Infosys Springboard
Completed; certificate received.

## ACTIVITIES

**College Hackathon** – Participated as part of a group in a college-level hackathon; participation certificate received.
